

TRAINING REQUIREMENT & AGREEMENT

For sanitation purposes and consumer safety, the United States Food & Drug Administration (FDA) requires that DNA Health Institute™ educate medical and aesthetic professionals on the proper use of all cryogenic (frozen) products. For this reason DNA Health Institute™ must require and confirm that the CryoStem™ products are administered by licensed professionals and that each professional administering these products complete a training seminar.

Please fax a copy of the current license, for all professionals who will be administering the CryoStem™ Ampoules to DNA Health Institute™ corporate office fax at 805.645.9978.

Training seminar attendance is required within six (6) months of opening an account for any licensed professional who will be administering the CryoStem™ Ampoules. Please ask your sales representative or check the website: www.dnaskin.com for information on the next scheduled training seminar. You may also call the corporate office for more details at: 800.676.4616.

Please sign and return this form with the professional licenses of all staff members who will be administering the CryoStem™ Ampoules.

Names of professionals who will attend training:

_____	_____
_____	_____
_____	_____

Company: _____

By signing this document you acknowledge the training requirements and commit to having all licensed staff members attend training within six (6) months of opening an account with DNA Health Institute™.
